Vietnam leads the world in ASC-certified pangasius production

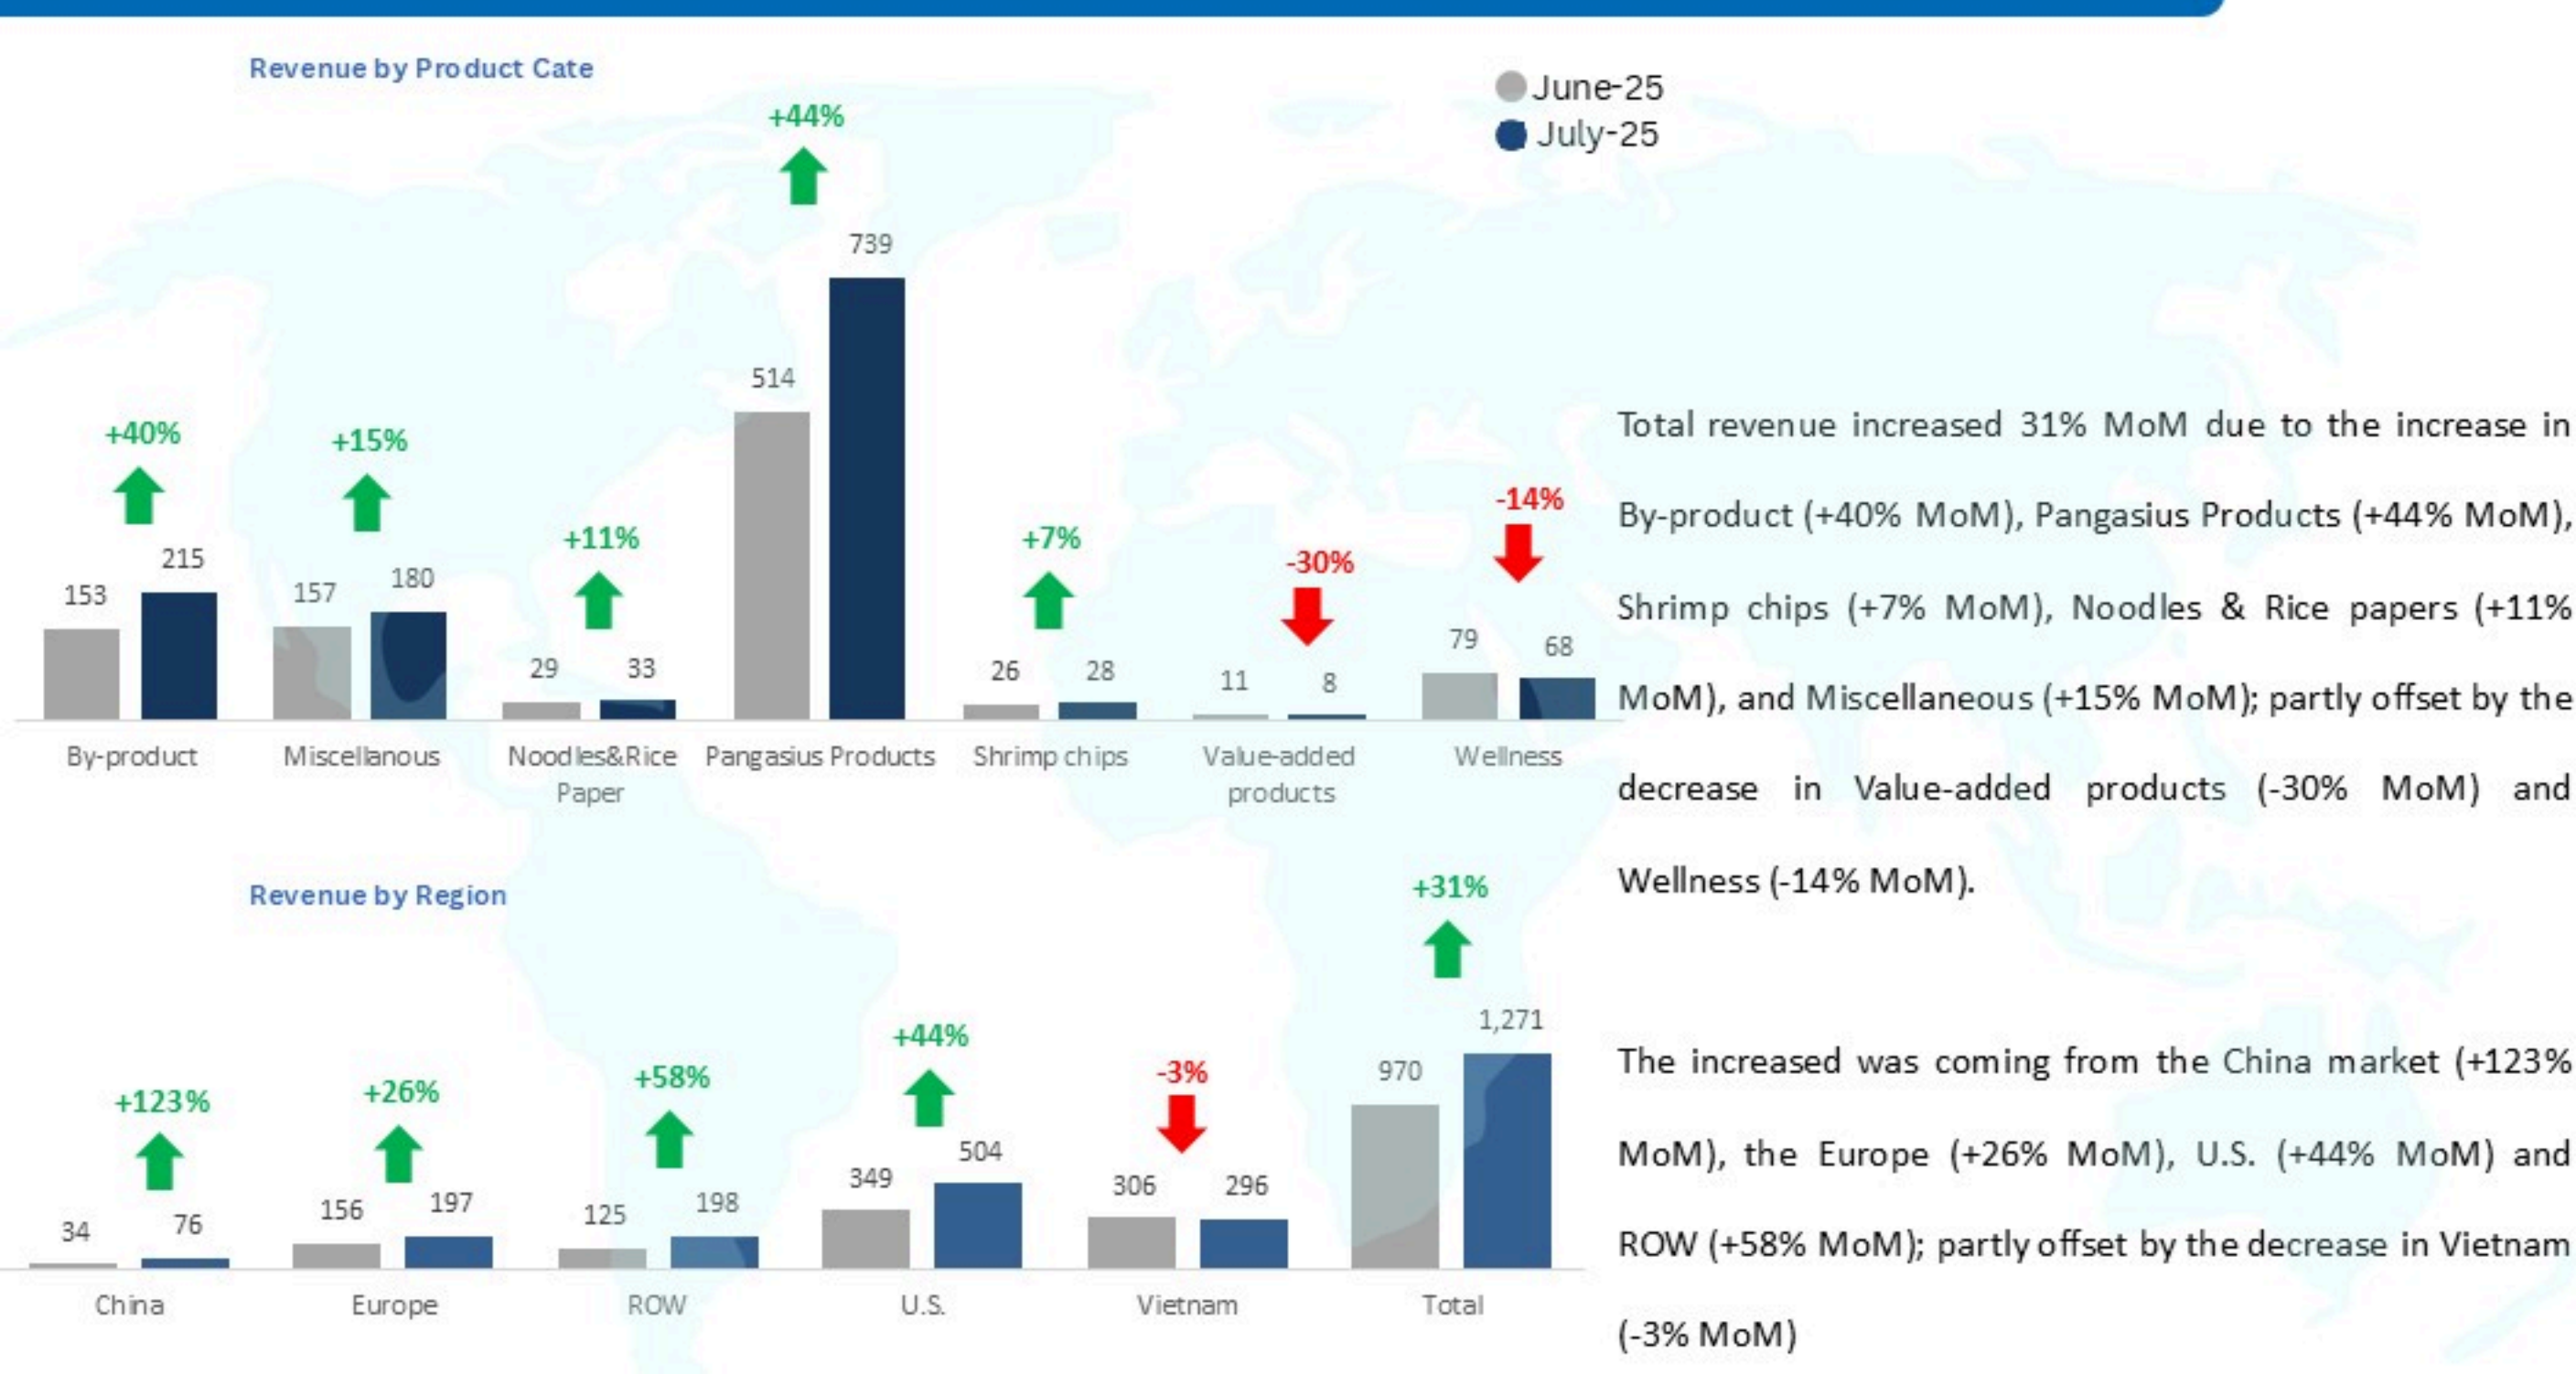

In the context of sustainable aquaculture standards increasingly becoming a mandatory requirement in demanding export markets, Vietnam has risen to lead the world in ASC (Aquaculture Stewardship Council) certified pangasius production. At present, the entire global output of ASC-certified pangasius comes from Vietnam.

... The ASC certification not only affirms the quality and reputation of Vietnamese pangasius in the international market but also reflects the industry's strong shift toward green and sustainable development. With this advantage, Vietnam holds the "golden key" to maintaining and expanding its pangasius market share in premium markets, amid a global consumption trend increasingly favoring environmentally and socially responsible products.
